

Millennium(S) Smart Home/Office Systems

Add value, convenience, security and prestige to a new residential development with a Millennium(S) Smart Home/Office Systems. Millennium(S) is the state-of-the art but simple-to-operate system which combines Alarm, Home Automation, Intercom and Voicemail in one unbeatable package.

Home / Office Security

Millennium(S) is full featured security system with options to arm it in Away Mode, Home Mode, Night Mode or Vacation Mode. Upon detection of any alarm condition, Millennium(S) will automatically activate a dial out sequence to page you, call you or the central monitoring station. User will be notified with specific alarm message over the phone and are able to access the situation immediately without any delay.

Millennium Control Panel, Keypad & Doorphone.

DP03

Doorphone / Intercom

Millennium(S)'s Door Station provides a doorphone and intercom function. The unit contains a built-in speaker, microphone and tamper protection. An internal volume control enables speaker volume adjustment. When the doorbell is pressed, the internal telephones will ring, allowing any telephone to communicate with the visitor at the Door Station. If the system is armed to Away Mode, the system dials to a programmed telephone allowing remote communication with the visitor.

keypad
